

Discard survival of coastal elasmobranchs in a small-scale fishery using acoustic telemetry
 Alonso-Fernández A.*; Mucientes G.; Villegas-Ríos D.

Acoustic telemetry reveals high (85%) survival rates of elasmobranchs in small-scale fisheries

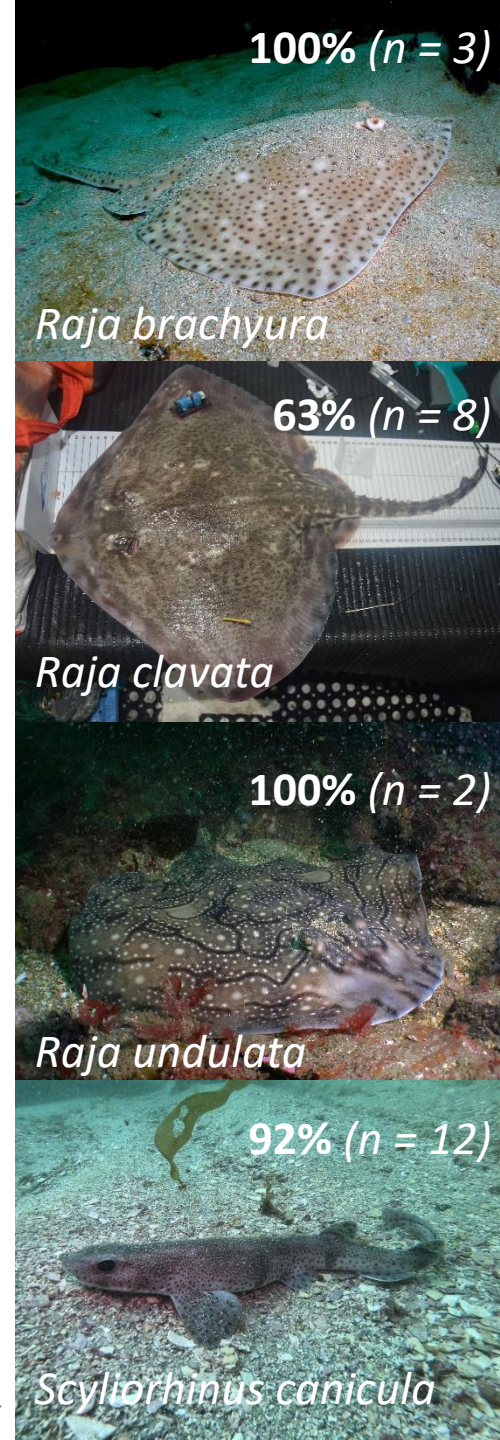

Survival >14 days

Fix acoustic array on NW Spanish Atlantic coast (24 VEMCO receivers)

Longline
 5 fishing trips (2019)
 ~800hooks/trip

100% (n = 3)

Raja brachyura

63% (n = 8)

Raja clavata

100% (n = 2)

Raja undulata

92% (n = 12)

Scyllorhinus canicula
